

Twister™ Methods

Intensive upgrade vinyl - Standard

How to upgrade vinyl floor using a single disc machine.

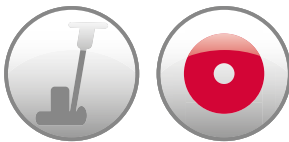

Note! Please use the description for Daily Cleaning together with these instructions in order to obtain good cleaning results.

Step 1:

Remove loose dirt from the floor. Carry out safety checks and mount the water tank. Mount the driving disc with a Twister™ Red pad. Fill the tank with clean water.

Step 2:

Start at the furthest point from the door/electricity plug. Apply the water with the single disc machine and scrub the surface working backwards in overlapping paths. Use a Twister™ Red – Utility pad for edges / borders

Step 3:

Proceed scrubbing the surface with the single disc machine until the floor is clean.

Step 4:

Pick up the dirty water with a wet vacuum cleaner.

Step 5:

Once the floor is dry, buff the surface using a Green Twister™ pad on a high-speed burnisher.

Note! After the upgrade is done the floor should be maintained with a Twister™ Green pad and water during daily cleaning to preserve the cleanliness and shine.
