

HTC - the Innovators, not the imitators!

# HTC Twister™ Vinyl/Plastic floor guide

**Material:**

Made of Poly vinyl chloride (PVC). Sometimes with poly urethane (PUR) top.

**Characteristics:**

Mostly installed as tiles. Available in a wide range of colours.

**Availability:**

Commonly found in public areas, stores, hotels and hospitals.

**TWISTER on vinyl floors**

Twister is effective as a maintenance method to keep vinyl tiles clean and in good condition without chemicals. It is ideal for upgrade (intensive and standard) and daily maintenance (green Twister). Dry buffing will in most cases increase gloss.

NOTE! The Twister pad will not wear down vinyl floors!

**Description/how to recognize**

The tiles can be of many different patterns, sizes and shapes.

**Attributes/softness**

Soft

**How to use TWISTER**

Ideal for upgrade (intensive and standard) and daily maintenance (green Twister). Dry buffing will in most cases increase gloss.

**Expected result/tips and tricks**

High cleanliness, only use water, process done without chemicals. Dry buffing often increases the shine on vinyl tiles.
