Product description:
These are floor maintenance pads made of polyester fiber in a non-woven web with resins throughout which are bonded to the structure. One side of the pad is prepared with diamond powder, fixed with adhesive. The pads are normally approximately one inch thick and available in a variety of sizes.

Intended use:
The pad is developed to be used for floor cleaning, polishing and daily maintenance of different floor types.

Durability and speed limits:

Standard sizes:
4-6, 8-22, 24, and 27-28 inch diameter. Other sizes and shapes available upon request.

Product Characteristics:
Pad color: Grey. The impregnation is in different colours depending on different diamond grit/size.

Marking: All markings are on one side of the pad (opposite side to the diamond impregnation). The markings consist of the pads colour, the dimension in inches and pat.pend.

Centre hole: Pre-cut at 3¼" (82,6mm)

Directions for use:
1. Dry mop floor and collect sand and gravel. Dry mopping reduces the wear on your TWISTER, as well as on the floor and cleaning tools.
2. Mount the TWISTER pads on a Velcro holder without central locks. The pad is fastened with the textured side facing the Velcro holder and the coloured side facing the floor.
3. Clean the floor.

Maintenance of pad:
1. Remove pad from machine after each use.
2. Rinse the pad thoroughly with water. This removes dirt that can wear on the floor and your TWISTER.

Packaging and marking:
All pads are packaged in 2 pads per dual pack.

Special features:
Chemical free cleaning method.
Works on almost all floor surfaces
TWISTER replaces your traditional pads and cleaning compound. Your daily cleaning routines remain the same.
The system is universal, meaning it is suitable auto-scrubbers, single-disk scrubbers and burnishers machines worldwide.
